Rippling App Shop

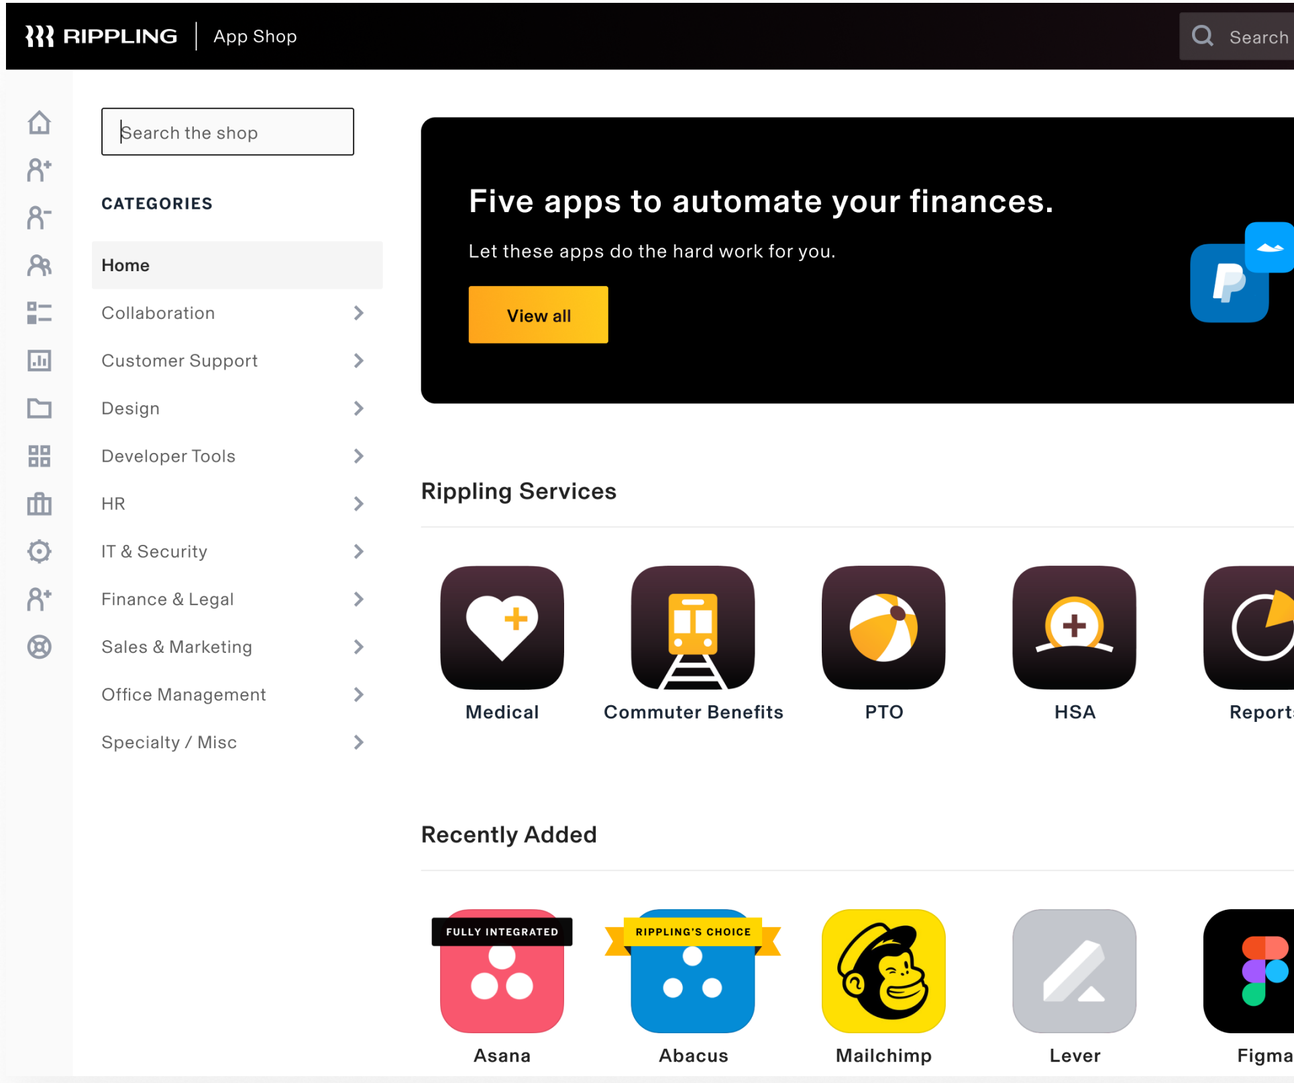
Exclusive App Partners Listing

App Listing Overview

Rippling's app shop provides the best opportunity for you to showcase your product, and gives our mutual customers (and potential customers) a better understanding of the power of our integration.

Please review the assets below and then fill out the form provided in order to submit your new assets.

If you have questions please reach out to apps.partnerships@rippling.com

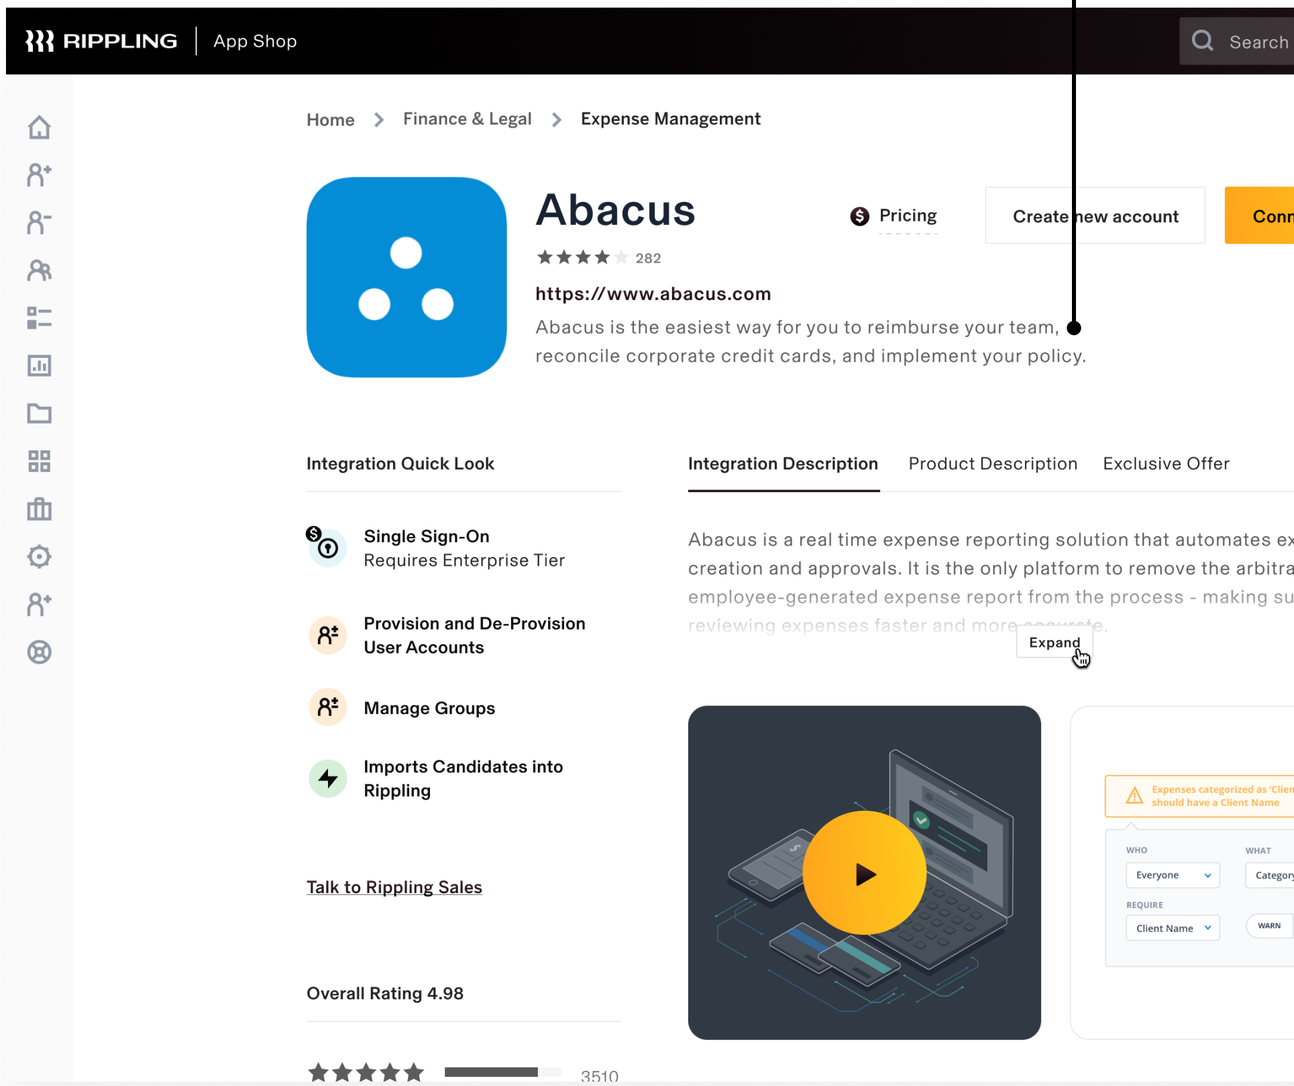


Short description

Please use 180 characters Maximum.

Example description:

Abacus is a real-time expense reporting solution that automates expense creation and approvals.



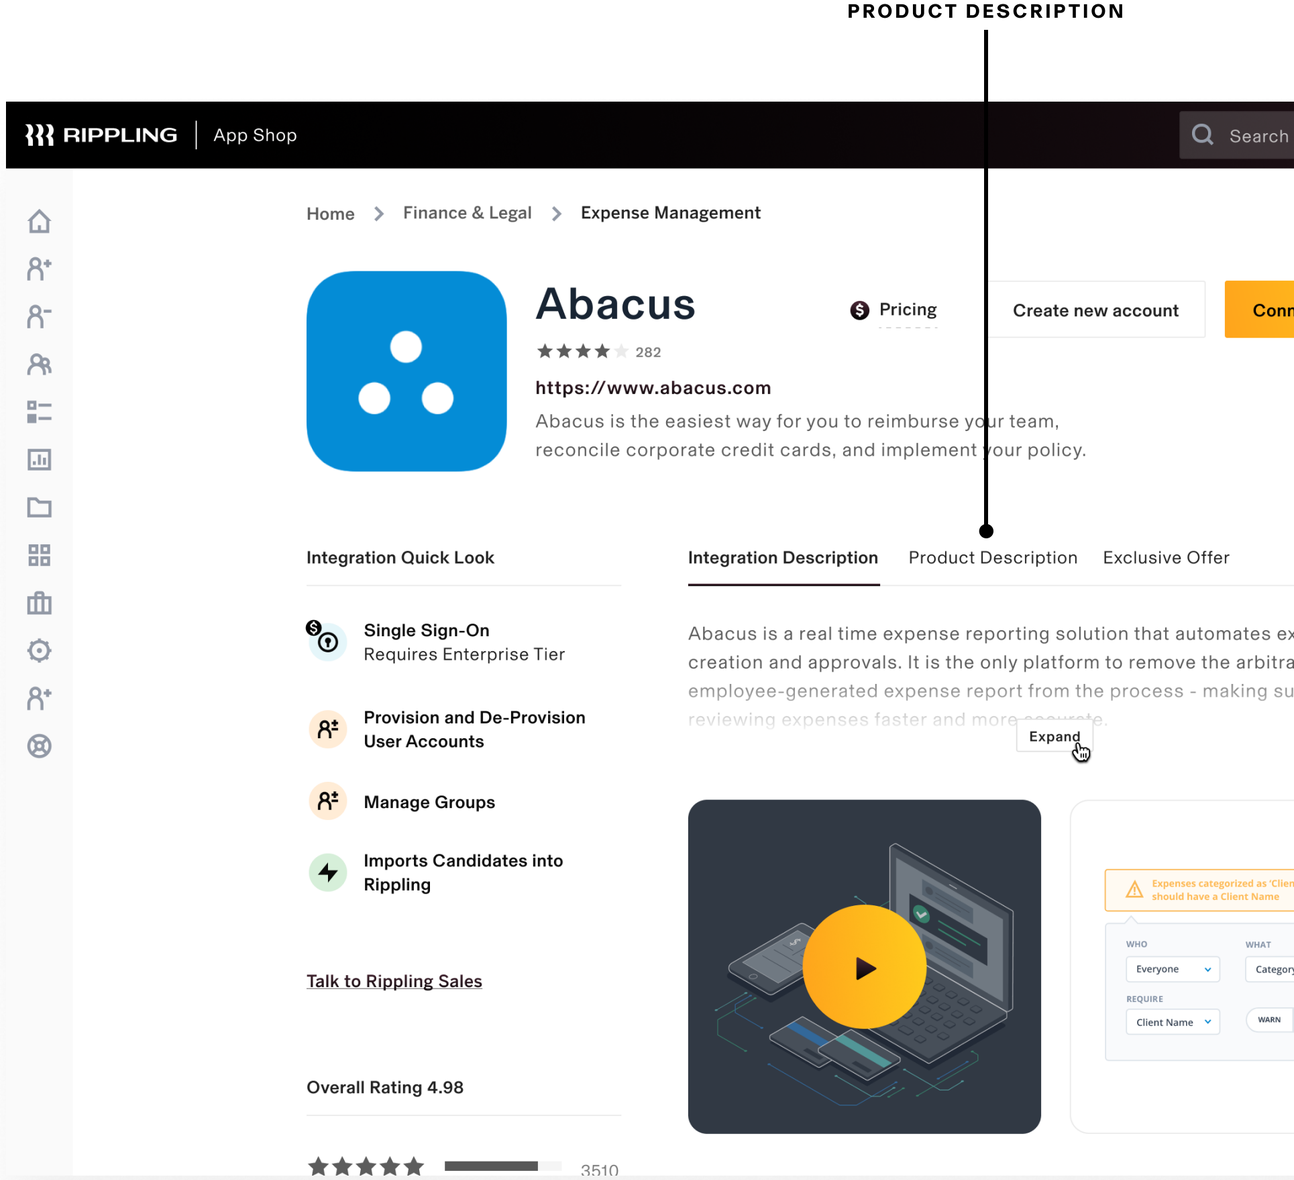
Product Description

Example description:

Abacus eliminates the need for employee-generated expense reports, making submitting and reviewing expenses faster and more accurate. Their real-time tracking system uses data and behavior analysis to automate expense creation and approvals. Accurate, up-to-the-minute information helps you make more confident decisions when approving expenses, or analyzing company spend, budgets, and return on investment.

Abacus drafts expenses using reliable data sources like receipts and card transactions to ensure records are complete and accurate. Policy rules are applied before expenses are submitted to prevent violations. Routing rules then automatically send the expense to the best-matched approver. Abacus flags separates out expenses that violate policy, are approaching budget, contain errors, or are potentially fraudulent, so you can focus your attention on these exceptions.

Build custom reports with real-time data to help you



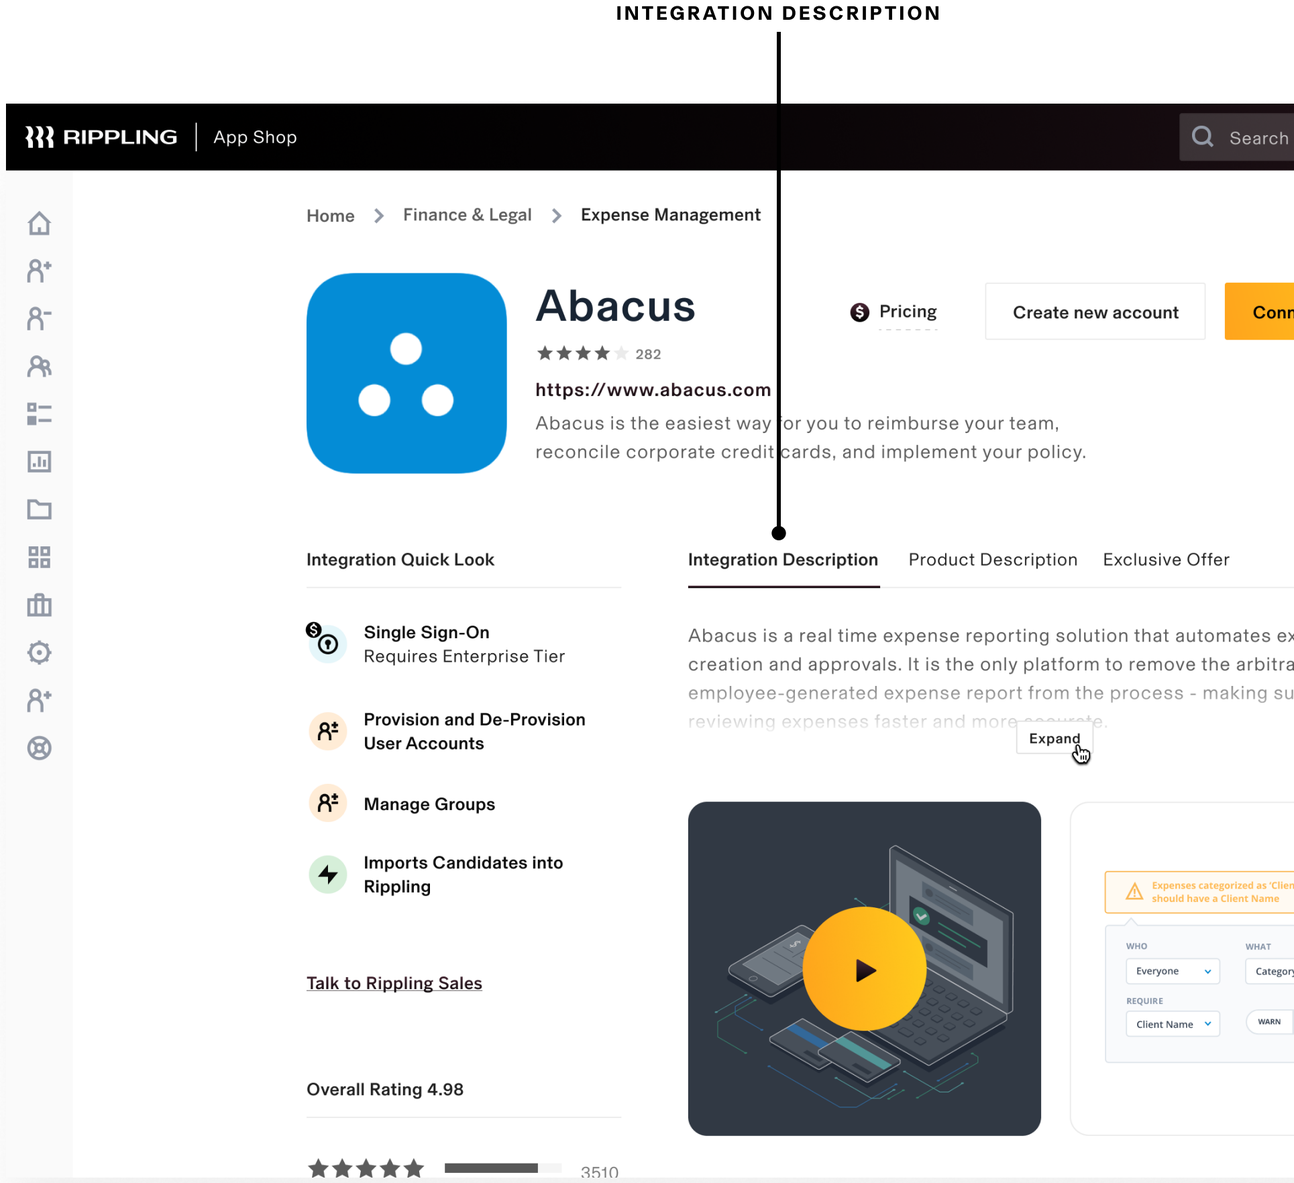
Integration Description

Example description:

Integrate Abacus with Rippling to automate expense reporting and reimbursement. Employees can access the software they need to accurately and easily track and report expenses from day one. Rippling's integration with Abacus includes the following capabilities.

Create and Remove Accounts in Abacus

Connect Abacus with Rippling to automatically create and remove user accounts when you onboard and offboard employees. You can use smart rules to set configurations about who should have access and when, so every employee has exactly what they need from the start..



URL’s

Personalized URL

This will be the URL to your Company Website

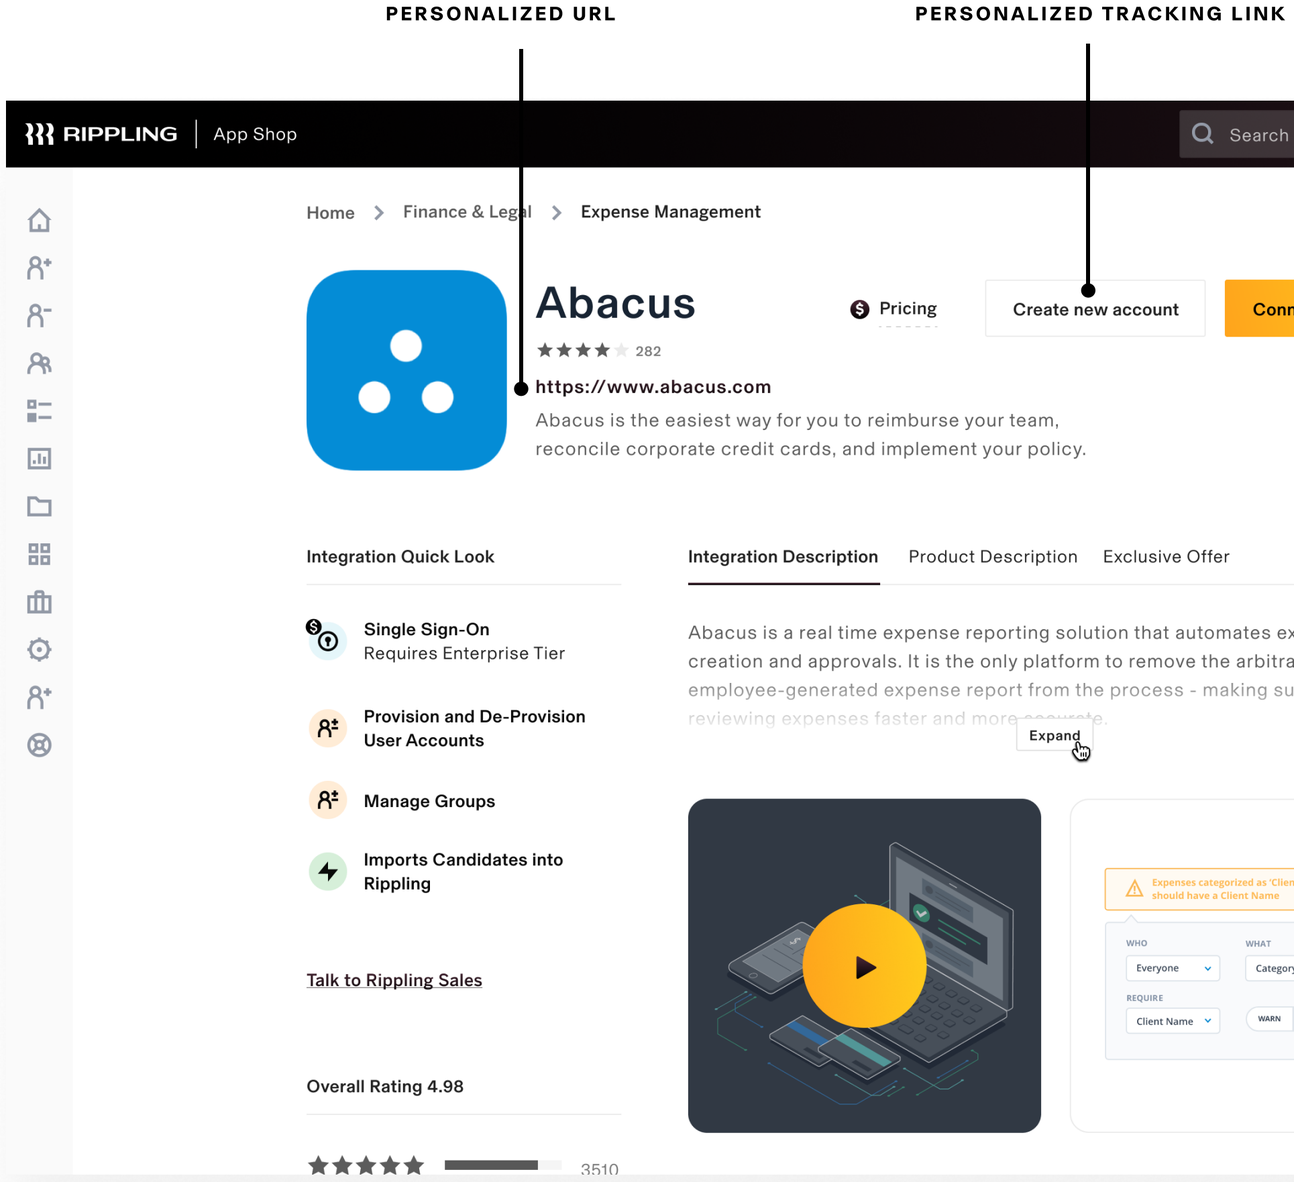
In order for us to optimize the App shop as a traffic driver and send referrals to your team, please provide a unique URL, and preferably to a unique landing page, for us to embed on your listing.

It’s important this is a unique tracking URL, either with UTM or other. That will allow your team to effectively measure, and report on any referrals we direct to you.

Please reach out with any questions.

Personalized Tracking Link

UTM tracked link for direct referrals (from Rippling's app store). CTA : Create New Account .



Special Pricing Offer

Please add any special pricing you'd like to offer Rippling clients. This will be a plain text field, so if you'd like any special phrasing, please provide, otherwise we will complete.

If you have questions please reach out to apps.partnerships@rippling.com
